Confidence reverses; back below average

- The ANZ-Roy Morgan Consumer Confidence index made a U-turn last week, falling 2.1%. All the subindices were in the negative, except future economic conditions.
- After two weeks of strength, the financial conditions subindices faltered. Current finances fell 3.2%, while future finances declined 1.6%.
- Economic conditions subindices were mixed, with current economic conditions declining 1.6%, while future economic conditions rose a marginal 0.3%.
- The 'Time to buy a household item' continued with its see-saw pattern, falling 3.9% after a gain of 1.3% last week. The four-week moving average of inflation expectations (IE) remained stable at 4.0%, though the weekly reading saw an increase to back above 4%.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

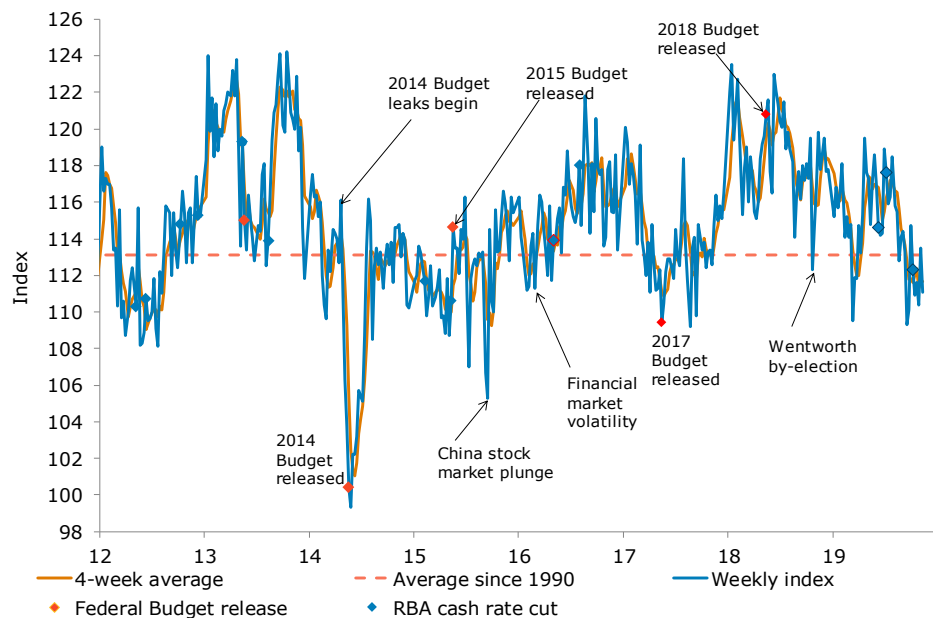

Last week (9-10 Oct)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (4-week ma)
111.1	-2.1%	111.7	113.1	4.0%

Data collected last weekend (Saturday and Sunday), based on around 1,000 face-to-face interviews. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

The fall in consumer confidence was a bit disappointing amidst strengthening global macroeconomic conditions and some reasonable domestic news in the form of a huge trade surplus and continued good news on housing. These data points were clearly not enough to offset a fall in the volume of retail sales for the September quarter, the first drop in annual retail volumes since the early 1990s recession, and a soft ANZ job ads. The defining feature of the survey remains the divergence between financial and economic conditions. The RBA will be pleased to see an up-tick in inflation expectations.

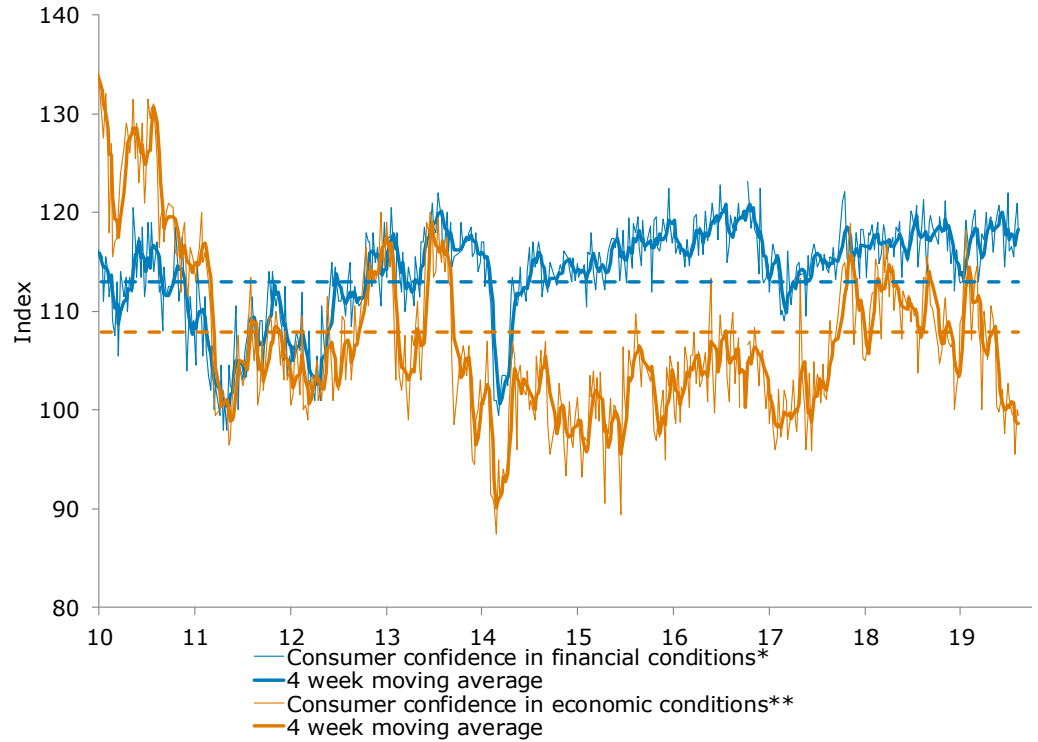

Confidence fell
