## Confidence rebounds

- Confidence jumped by a solid 4.2% last week, closing above its long term average. The gain was broad-based with all the subindices rising.
- Current finances were up 6.9% while future finances gained 5.9%. Both financial conditions indices remain above their long term averages.
- Current economic conditions rose by 3.5%, while future economic conditions jumped 5.7%. Despite the jump, both the subindices remain below their long term averages.
- A 7.1% jump in 'time to buy a major household item' was encouraging after the drop to a 10 year low last week, although the index remains well below its long run average.
- Inflation expectations were unchanged at 4.1%.

## ANZ-Roy Morgan Consumer Confidence and inflation expectations

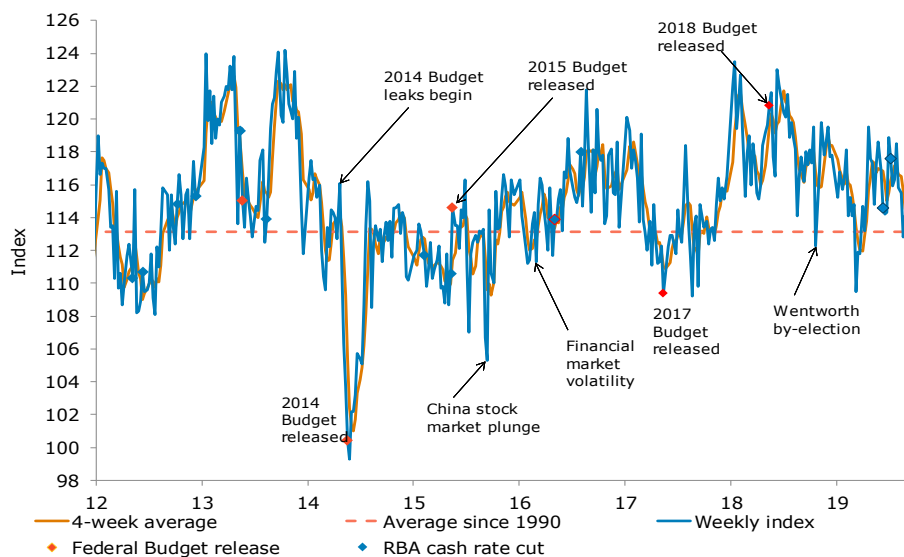

Last week (28-29 Sep)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (4-week ma)
114.7	4.2%	111.9	113.1	4.0%

Data collected last weekend (Saturday and Sunday), based on around 1,000 face-to-face interviews. Not seasonally adjusted. Further data history on page 6.

## ANZ Senior Economist, Felicity Emmett, commented:

"Building on a modest gain in the previous week, confidence bounced a strong 4.2% last week. This jump came despite ongoing geo-political tensions and less than encouraging domestic data prints, suggesting the possibility that the early signs of recovery in the housing sector and expectations of further easing by RBA may be supporting consumer sentiment."

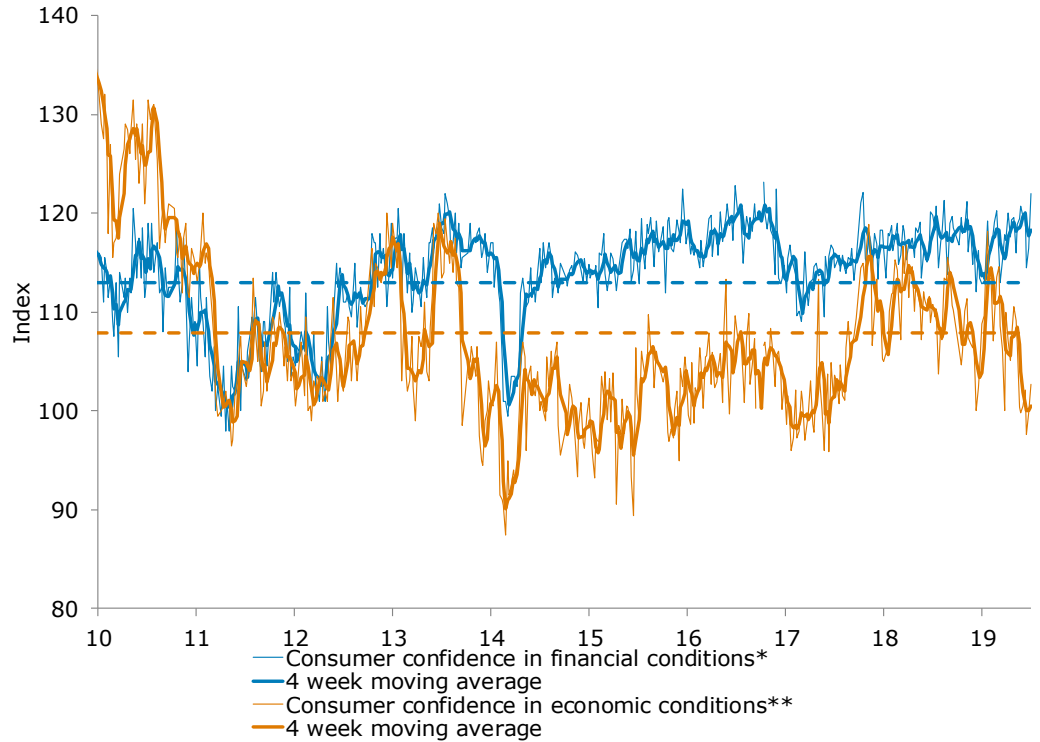

## Confidence jumps 4.2%
