ANZ Head of Australian Economics, David Plank, commented:

Confidence strengthened last week as the rate of growth in COVID-19 cases declined in Melbourne and Sydney. The positive July labour market data, which was better than market expectations, may have contributed to the lift in sentiment. Confidence of Melbourne consumers lifted the most, but is still the lowest of the major capital cities. The move higher follows seven straight weeks of falls, so a tick up was due; and with confidence remaining at a level that is well below average we aren't getting too carried away by the positive result. Consumers are still very cautious about the outlook.

Confidence gained 2.4%
