ANZ Senior Economist, Catherine Birch, commented:

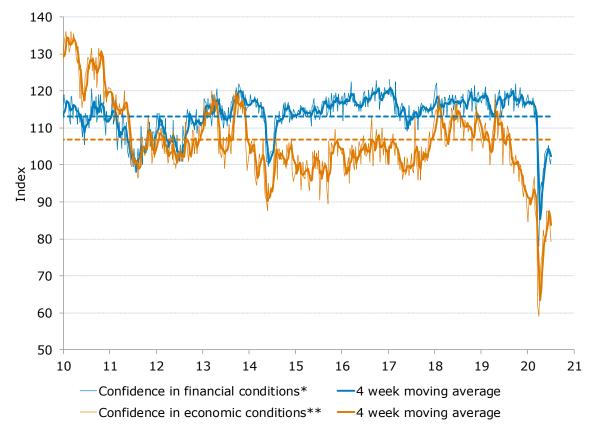

Confidence fell a further 1% last week, taking it to an eight-week low. Although there was a marginal improvement in how people felt about their financial conditions, confidence in economic conditions continued to deteriorate. This was not surprising, with new COVID-19 case numbers continuing to escalate in Melbourne. While the return to lockdown has so far been localised to 12 postcodes, the confidence effect is more pervasive. The uncertainty also appears to be discouraging households from committing to large purchases, with 'time to buy a major household item' falling heavily for a second week.
