Confidence starts 2021 on a flat note

- Consumer confidence details were mixed, with two of five subindices up and three down, with the overall index 0.1% weaker than the last survey of 2020 (the weekend prior to Christmas).
- 'Current financial conditions' rose 2.1%, while 'future financial conditions' worsened 1.9%.
- 'Current economic conditions' deteriorated by 2.3%, while 'future economic conditions' declined by 1.4%.
- 'Time to buy a major household item' was up 3.3%. The four-week moving average of 'inflation expectations' was unchanged at 3.7%.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

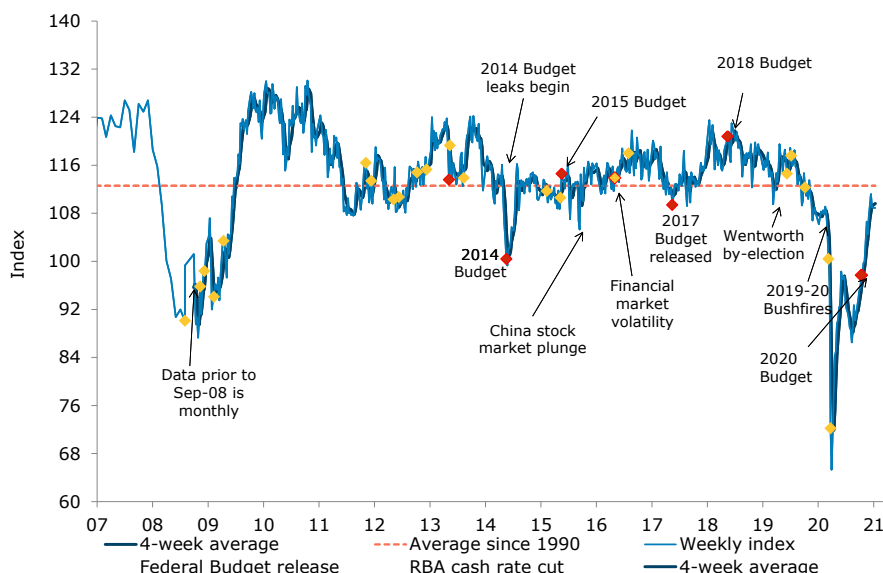

Last weekend (9-10 Jan)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
108.9	-0.1%	109.6	112.6	3.7%

This weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,529 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

For the third year in a row, consumer confidence has begun the year on a flat/downbeat note compared to the pre-Christmas level. Given the Brisbane lockdown and the widespread border closures, the effectively flat result for confidence might be seen as a reasonably good outcome. But confidence usually rises over the holiday period. Between 2009 and 2018, consumer confidence rose 3.3% on average between the last survey of December and the first of January. In this context, the result for this survey should be viewed as soft. Interestingly, notwithstanding the short lockdown, confidence in Brisbane and rest of Queensland was up on the pre-Christmas week. On the other hand, confidence in New South Wales and Victoria declined, as borders closed.

Confidence essentially flat over the holiday period
