ANZ Senior Economist, Adelaide Timbrell, commented:

Consumer confidence experienced its biggest weekly fall since early August 2022. Confidence about current and future finances fell sharply, perhaps sparked by concerns about the extent of cash rate rises after the Q4 inflation print. Household inflation expectations drifted up but are still lower than expectations during the final three months of 2022. Average confidence among homeowners paying off their mortgages fell less than other housing status cohorts, though still ended the week with lower confidence than renters and outright homeowners.
